

# Increase Workplace Productivity with Microsoft Copilot

Instantly catch up on meetings with clear summaries, key decisions, and action items, turning conversations into follow-ups or tasks.

## Meetings and Collaboration

Instantly catch up on meetings, key decisions, and action items, turning conversations into follow-ups or tasks.

## Content and Communication

Draft, refine, and transform documents, emails, and presentations faster, and without starting from scratch.

## Knowledge and Insights

Surface insights across emails, chats, and files to get answers grounded in your organization's data, without searching.

### From Productivity Tool to Business Capability

When deployed with the right strategy, Copilot helps organizations standardize how work gets done, reduce cognitive overload, and enable teams to operate at a higher level without adding complexity. The result is faster execution, clearer communication, and better use of institutional knowledge across the business.

### Making Copilot Work for Your Organization

Paragon Micro helps organizations move beyond “turning Copilot on” to making it a meaningful part of how people work. We guide licensing decisions, assess readiness, align Copilot to Microsoft security best practices, and help teams adopt it in ways that drive measurable impact.

## Ready to turn Copilot into real business value?

Connect with your Paragon Micro Account Manager to explore licensing options and build a Copilot adoption strategy designed for your organization in 2026.
